

TRUPTI GANGJI

Baltimore, MD | +1 (667) 369-5231 | truptigangji@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with experience in Python, SQL, Power BI, and ETL development, transforming complex datasets into actionable business insights. Built scalable data pipelines handling 100K+ records, automated reporting workflows, and developed dashboards and predictive models that improved operational efficiency across healthcare, finance, and research domains.

EDUCATION

University of Maryland, Baltimore County | *Master's in Information Systems* May 2025

Coursework: Advanced Databases, Data Mining, Structured System Analysis, Advanced AI, Data Analytics for Cybersecurity.

Visvesvaraya Technological University | *Bachelor's in Electronics and Communication* Aug 2021

Coursework: Network Analysis, Control Systems, Operating Systems, Digital Signal Processing, Machine Learning.

PROFESSIONAL EXPERIENCE

Data Analyst | *UMBC College of Engineering and Information Technology* Feb 2024 – Jan 2026

- Cleaned and structured 100K+ patient records using Pandas and Excel, fixing missing values and inconsistencies to ensure data integrity for downstream research and reporting.
- Designed interactive Power BI dashboards and automated Excel reports (Pivot Tables, Power Query), enabling self-service analytics, tracking project workflows through Jira, and reducing ad-hoc requests by 30%.
- Built a Python (scikit-learn) predictive model to estimate patient health risk, supporting resource planning and decision-making.
- Automated recurring ETL workflows using SSIS and Python scripts, saving several hours of manual data processing each week.

Research Assistant | *University of Maryland Baltimore County* Sept 2024 – Dec 2025

- Built a data pipeline to combine clinical text and speech data for early dementia research, creating a structured dataset for analysis.
- Processed and cleaned large audio and text datasets using Python and SQL, improving data quality and reducing missing or inconsistent records by 25%.
- Extracted key NLP and speech features (language patterns, speech behavior markers) to support cognitive score prediction.
- Combined multiple data sources into a unified dataset to enable accurate prediction of patient MOCA cognitive scores, improving model performance by 12%.

Research and Development Intern | *Neopathology Corp.* May 2024 – Aug 2024

- Conducted a literature review on tissue morphology assessment and identified suitable techniques for medical image analysis.
- Analyzed tissue images using Python (OpenCV) to extract cell features like shape, structure, and organization for research use.
- Engineered automated pipelines to extract image measurements and structure them into organized datasets using Python and SQL.
- Collaborated with clinical teams to validate extracted data using Excel and SQL, improving data completeness by 26%.

Data Analyst | *Government Tool Room and Training Center* Feb 2023 – Aug 2023

- Collected, cleaned, and analyzed industrial machine data using Python and Excel, improving reporting turnaround time by 30%.
- Developed ETL pipelines using Python and SQL (MySQL), applying Azure-aligned cloud data storage concepts to integrate machine logs, SCADA, and CMMS data into a centralized database.
- Built Power BI dashboards and automated Excel reports to track machine utilization, downtime, throughput, and productivity.
- Performed trend and time-series analysis to identify inefficiencies, increasing output by 12% and reducing downtime by 10%.
- Created KPI dashboards for operational monitoring, enabling data-driven decision-making for management.

Financial Analyst | *Aradhana Finance* Mar 2021 – Jan 2023

- Led FP&A activities including budgeting, forecasting, variance analysis, and monthly MIS reporting for decision-making.
- Performed data reconciliation and financial audits using SQL and Excel, identifying discrepancies, control gaps, and ensuring 100% compliance with accounting standards.
- Conducted variance, trend, and root-cause analysis on financial and operational data to identify anomalies and key business insights.
- Built Power BI and Tableau dashboards tracking KPIs (revenue, expenses, collections), improving reporting accuracy by 20%.
- Developed Excel financial models and forecasting scenarios to support budgeting and improved collection efficiency by 15%.

TECHNICAL SKILLS

Programming Languages: Python, SQL (MySQL, Oracle), R

Data Analysis: Pandas, Statistical Modeling, A/B Testing, EDA, Data Cleaning, Data Validation, Predictive Modeling

Financial Analysis: FP&A, Budgeting, Forecasting, Variance Analysis, MIS Reporting, Reconciliation, KPI Tracking

Data Visualization & Reporting: Power BI, Tableau, Microsoft Excel (Pivot Tables, Power Query, VLOOKUP)

Data Engineering: ETL Pipelines, SSIS, Data Transformation, Data Modeling

Cloud & Tools: AWS, Azure, Databricks, Jira, Git, GitHub, Jupyter Notebook
