Baltimore, MD | +1 (667) 369-5231 | truptigangji@gmail.com | linkedin.com/in/trupti-gangji | github.com/truptigangji

PROFESSIONAL SUMMARY

Data & BI Analyst with 5+ years of experience in Python, SQL, Power BI (DAX, Power Query), and Tableau. Specialized in ETL pipeline development, dimensional modeling, and self-service dashboard design. Reduced ad hoc reporting by 30%, processed 100K+ records with high accuracy, and improved predictive model performance by 12%. Adept at data storytelling, data-driven decision making, and cross-functional stakeholder reporting across healthcare, operations, and research domains.

Core Competencies: Business Intelligence | Data Visualization | ETL Development | Data Modeling | KPI Tracking | Predictive Modeling | Data Governance | Self-service Analytics | Data Quality Management | Stakeholder Management | Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Data & BI Analyst | *UMBC College of Engineering and IT*

Feb 2024 – Jan 2026

- Cleaned and validated 100K+ patient records (Python, Excel), resolving data integrity errors for research-ready data pipelines.
- Designed self-service **Power BI** dashboards (DAX, Power Query, Power BI Service) with reporting automation, reducing ad hoc requests by 30% for 20+ researchers.
- Built a patient health risk prediction model (**scikit-learn**) supporting resource planning and cross-functional decision-making.
- Automated ETL workflows (SSIS, Python), saving 5+ hrs/week; enforced data governance and RLS.

Research Assistant | *University of Maryland Baltimore County*

Sept 2024 – Dec 2025 (concurrent)

- Architected an end-to-end ETL pipeline processing 10K+ clinical text and speech records for dementia detection research, enabling structured analysis across 3 data modalities.
- Cleaned large-scale audio and text datasets (Python, SQL), applying data quality management checks and reducing missing/inconsistent records by 25%.
- Performed feature engineering on speech and language metrics, improving MOCA score prediction by 12%.
- Consolidated heterogeneous data sources into a unified dimensional model for predictive analytics and cross-functional reporting.

R&D Intern | *Neopathology Corp.*

May 2024 – Aug 2024

- Engineered automated ETL pipelines (Python, SQL) with data quality checks to extract tissue image measurements into structured relational datasets, reducing pipeline errors by 20% for a centralized data catalog.
- Extracted quantitative cell features from medical images using **Python (OpenCV)**, supporting diagnostic analysis workflows and root cause analysis of tissue anomalies.
- Validated datasets against clinical ground truth (Excel, SQL), improving data completeness by 26%.

Data Analyst | *Government Tool Room and Training Center*

May 2021 – May 2023

- Built ETL pipelines (Python, MySQL) consolidating machine logs, SCADA, and CMMS records into a centralized data warehouse.
- Designed star schema dimensional models enabling scalable self-service analytics, reducing report generation time by 30%.
- Delivered Power BI dashboards and Excel KPI reports tracking utilization, downtime, and throughput with RLS for role-based access.
- Performed time-series trend analysis, increasing production output by 12% and reducing equipment downtime by 10%.

Financial Analyst | *Aradhana Finance*

May 2020 – Apr 2021

- Led FP&A functions – budgeting, forecasting, and variance analysis – delivering monthly budget-vs-actual reports and gathering business requirements to support strategic resource allocation decisions.
- Built **Power BI** and **Tableau** dashboards tracking revenue, EBITDA, and collection KPIs, improving reporting accuracy by 20% and collection efficiency by 15%.
- Developed multi-scenario financial models and cash flow projections (Excel) for budgeting, forecasting, and strategic planning.
- Audited and reconciled financial records (SQL, Excel), ensuring 100% GAAP compliance; delivered board-ready summaries for C-suite stakeholders.

TECHNICAL SKILLS

BI & Visualization:	Power BI (DAX, Power Query, Power BI Service, RLS, Power BI Embedded), Tableau, Looker, SSRS, Excel (Pivot Tables, Power Query), Matplotlib, Seaborn
Programming & Querying:	Python (Pandas, NumPy, scikit-learn, OpenCV, PySpark), SQL (MySQL, Oracle, T-SQL), R
Data Engineering:	ETL Pipelines, Apache Spark, Pipeline Orchestration, Apache Airflow, SSIS, Dimensional Modeling, Star Schema, Data Warehousing, dbt, Data Catalog, Data Governance, Data Quality Management
Analytics:	EDA, A/B Testing, Statistical Modeling,, Time-Series Analysis, Predictive Modeling, Feature Engineering, Root Cause Analysis, KPI Tracking
Cloud & Platforms:	Microsoft Azure, Azure Synapse Analytics, Microsoft Fabric, Azure Data Factory, AWS, Google BigQuery, Snowflake, Databricks, Git, GitHub, Jupyter Notebook, Jira

EDUCATION

University of Maryland, Baltimore County | *M.S. Information Systems*

May 2025

Coursework: Advanced Database Management, Data Mining, Data Warehousing, Data Analytics for Cybersecurity

Visvesvaraya Technological University | *B.E. Electronics & Communication Engineering*

Aug 2021

Coursework: Machine Learning, Network Analysis, Digital Signal Processing, Operating Systems
